

## SUMMARY

---

I am a web developer who takes pride in understanding the importance of generating applications that rely on an untarnished user experience. As a developer I have gained capabilities in both front end and back end stacks, building full stack applications using ES6, React, NodeJS, Express, Ruby, and Rails. I am looking for the opportunity to not only improve on what I already know, but to expand my knowledge of useful languages and frameworks.

## SKILLS

---

**FRONT END DEVELOPMENT:** HTML5, CSS3, JavaScript ES6, React

**BACK END DEVELOPMENT:** SQL, NodeJs, Express, Ruby, Rails

## EXPERIENCE

---

### General Assembly

Engineering Fellow · Dec. 2018 to Current · New York, NY

- Developed skills in full stack development through an immersive style course over twelve weeks, completing multiple solo and collaborative projects.
- Focused extensively on best practices for object-oriented programming.
- Gained proficiency in both front end and back end stacks to build responsive web applications.

### Yelp

Account Executive · Nov. 2017 to Oct. 2018 · New York, NY

- Consulted, educated, strategized, and successfully sold Yelp advertising programs through a high volume of cold sales calls with a range of local business owners.
- Dealt with regular objection handling and a maintenance of composure, making recommendations to suit client needs.
- Achieved and consistently exceeded monthly sales goals.

### Trustpilot

Account Development Representative · Aug. 2016 to June 2017 · New York, NY

- Contacted high level executives and business owners via cold calling and email outreach to create leads for Senior Account Executives.
- Researched prospects to identify decision makers and heighten interest in the platform.

## EDUCATION
